

# iQbonds

The all-in-one trading solution  
for European and American  
Governments Bonds, Credit and Swaps.

iQbonds is a comprehensive and functional rich Electronic Trading solution designed to operate at the highest level of performance and availability in the most demanding D2D & D2C markets. It aggregates all pre- and post-trade data simplifying the trade workflow while providing central data management and automated execution capabilities. This results in faster execution, fewer errors, and reduced total cost of ownership (TCO) by eliminating the need to use multiple single-venue GUIs.

## Scalable architecture for high-volume trading

iQbonds is designed to scale, supporting growing businesses and processing high trade volumes. It continuously calculates bond prices and yields across all available markets while seamlessly connecting to all key D2D and D2C trading venues.

## Unified market transparency

Enhance transparency with the system's ability to combine information from all connected venues, data sources and third-party systems into one unified application. Its fully flexible UI optimizes the management and control of prices, orders, and quotes with various views, information tools, and tickers – giving traders ideal conditions for their daily operations.

## Advanced Fixed Income pricing

iQbonds includes a comprehensive library of Fixed Income pricing methods and offers a vast selection of individual reference codes and data to empower users to react quickly to market changes. Calculate spreads to curves, futures, benchmarks, TED spreads, zero spreads and asset swap spreads for a class of bonds – all with exceptional precision and performance.

## Next-level Quote Management

iQbonds elevates your bond trading with its Advanced Quote Management module. Stream multiple quotes for a single bond across different venues, easily adapt your strategies to meet quoting obligations, and leverage synthetic/simulated quote and order types. With automatic and configurable hit reactions, traders can execute trades with speed and confidence – and stay ahead of the competition.

### Automation that outperforms

iQbonds unlocks the full potential of electronic low latency Pricing, Quoting and Trading across Fixed Income markets for investment banks.

## Powerful eCommerce & Workflow Automation

The platform's eCommerce capabilities empower your organization to streamline processes with fully normalized workflows, auto-negotiation, and advanced RFQ management. Its sophisticated rules engine optimizes client tiering, quote size, and multi-level pricing based on the venue, CCP/Bilateral (IRS). The powerful Axe Management module gives trading desks the tools to manage axes efficiently and confidently.

## Driving innovation through a data-centric architecture

Modern trading environments rely on architectures that centralize and streamline data across multiple systems. A data-centric approach enables institutions to automate workstreams, unify information flows, and operate with greater consistency and efficiency across their entire technology landscape.

Continuous platform enhancements and the integration of new gateways ensure that trading infrastructures can evolve alongside market trends. This adaptability allows firms to respond quickly to changing client requirements and regulatory expectations.

We have expanded our offering with next-generation fin-tech development accelerators, enabling clients being to differentiate through data-driven products and highly automated workflows. Built on top of robust, high performant trading solutions, these capabilities support scalability, speed, and long-term strategic growth.

## Why iQbonds?

- ✓ Integrates seamlessly with existing architecture
- ✓ Multiple automated pricing models
- ✓ Advanced Quoting Management
- ✓ Dealer-to-dealer workflows „pluggability“ with easy access to over 50 venues and liquidity pools, interfaces (APIs) to other 3rd party systems (covering both pre- and post-trade flows)
- ✓ Aggregation of multiple D2C solutions into a single interface (GUI)
- ✓ Advanced RFQ management (trader/client predictions supported by machine learning)
- ✓ Advanced AXE Management
- ✓ Flexible auto-negotiation rules
- ✓ Standard practice on compliance - comprehensive support for Sales-Trader workflows
- ✓ Cross-product support for Credit, Rates & Repos
