Broadcasting of SAC Reports with APOS Publisher for Cloud

Getting personalized analytics to the right people, at the right time, in the right format
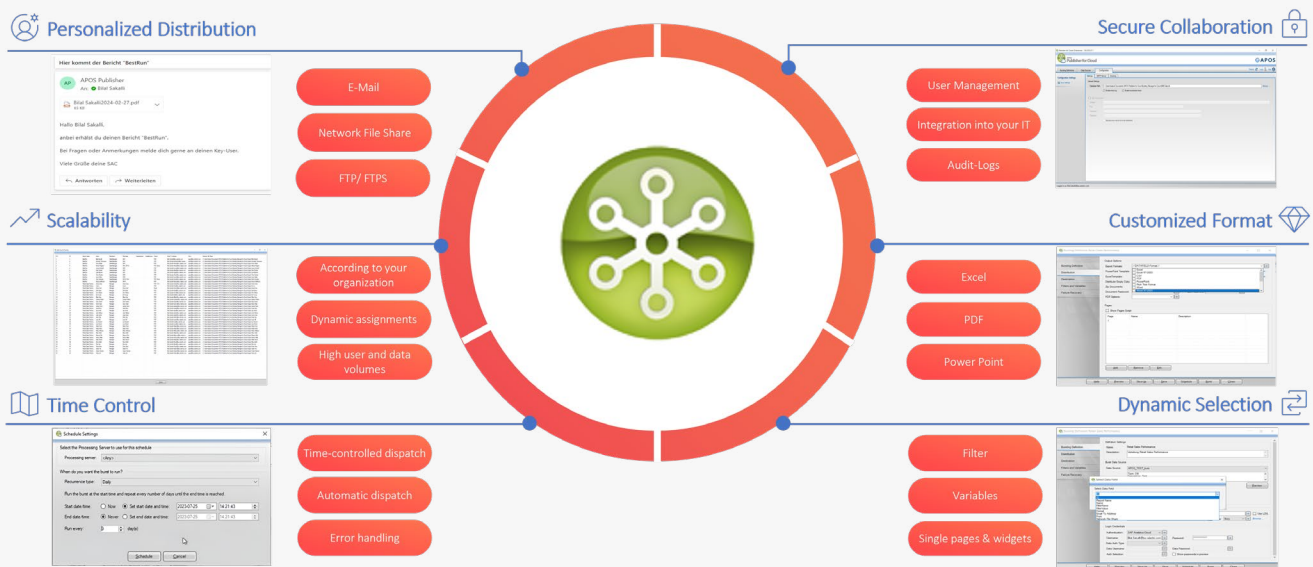

Overview

In today's data-driven business world, the efficient distribution of reports and analyses is crucial for success. Business departments and IT units face the challenge of providing a steadily growing number of stakeholders – from internal teams to external partners – with relevant information in a timely manner. The SAP Analytics Cloud is a powerful self-service tool that is not only excellent for planning, forecasting, and analysis, but also offers features for broadcasting reports. With broadcasting, companies can ensure that a variety of decision-makers receive exactly the insights they need for agile and informed action. Transform your communication and information processes and strengthen your data strategy together with valantic.

Why APOS Publisher for Cloud?

APOS Publisher for Cloud is a software solution that enables the automatic creation and distribution of customized versions of report content from the SAP Analytics Cloud (SAC). With this tool, personalized analyses can be sent at the right time, in the right form, and to the right recipients. It also ensures that report recipients only receive the data for which they are authorized.

Project procedure

valantic provides comprehensive support in setting up, configuring, and if necessary, expanding the broadcasting service in the SAP Analytics Cloud. We ensure seamless integration and customization to your specific requirements. In the background, our partners guarantee the provision of the necessary software and technical support. The maintenance of the report recipient lists is the responsibility of the clients, allowing them full control over data distribution. valantic stands by your side as an experienced partner to make the process efficient and user-friendly.

Optimize your SAC report distribution with valantic and APOS Publisher for Cloud!
