

YOUR PARTNER FOR

# SAP Sustainability Footprint Management

Calculate product footprints periodically and at scale across the entire product lifecycle.

## Objectives

SAP Sustainability Footprint Management, a SAP Cloud-native application, performs periodic and scalable product footprint calculations, encompassing the entire product lifecycle.

## Capabilities

- Enable real-time connection to SAP S/4HANA, maximizing the utilization of current business data and structures.
- Manage emission factors and conduct monthly calculations for all products within the system.
- Seamlessly integrate back into SAP S/4HANA systems and relevant end-to-end processes with built-in connectivity.

## Technology

- Runs on SAP Business Technology Platform
- Integration possibilities SAP S/4HANA and SAP S/4HANA Cloud
- Possible connection to SAP Sustainability Control Tower
- Possible connection to SAP Environment Health & Safety

## At a glance

### Challenges

- Reduced efficiency
- Expensive compliance costs
- Environmental impact
- Comply with changing regulations

### Benefits

- Reduced complexity
- Higher sustainability transparency
- Brand recognition
- Higher automation

### valantic offering

- Understand your emission situation
- Identify your emission drivers
- Decide on sustainability criteria

## Benefits

- Expand SAP S/4HANA end-to-end business processes by incorporating detailed product footprint information.
- Minimize the time and expenses associated with calculating, analyzing, and reporting product footprints.
- Attain a deeper understanding of product carbon footprints, empowering the implementation of actions for optimization.
- Leverage existing business data, structure, and logic seamlessly from SAP S/4HANA.

### In a Nutshell

Discover environmental insights with SAP Sustainability Footprint Management! Gain a holistic view of your product's lifecycle impact, using existing data combined with environmental factors for scalable footprint calculations. Seamlessly integrate these insights for disclosure and internal optimization. Elevate sustainability with SAP and valantic!
