

Hello! I am vally

make data & AI work

valantic GenAI Offering

December 2024

We make data & AI work with proven methods, demonstrated thought leadership, and 500+ Data & AI practitioners

Clear value proposition

make digital happen.
make data and AI work.

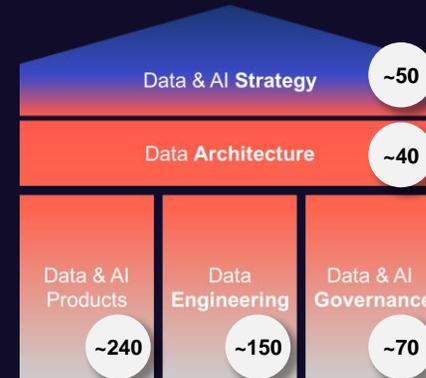

From strategy to execution:

We ensure our clients' successful transformation towards a **data driven organisation**.

We help to identify, prioritize, and launch **AI use cases and solutions to enhance our clients' capabilities**.

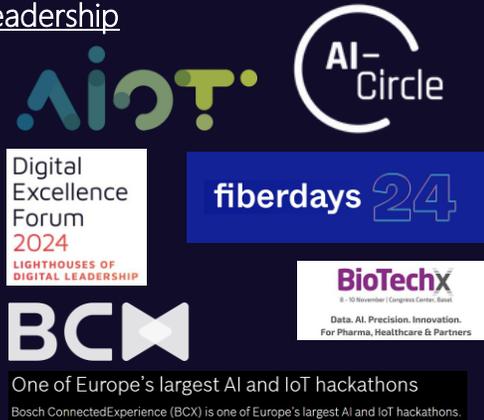

Strong ability to deliver

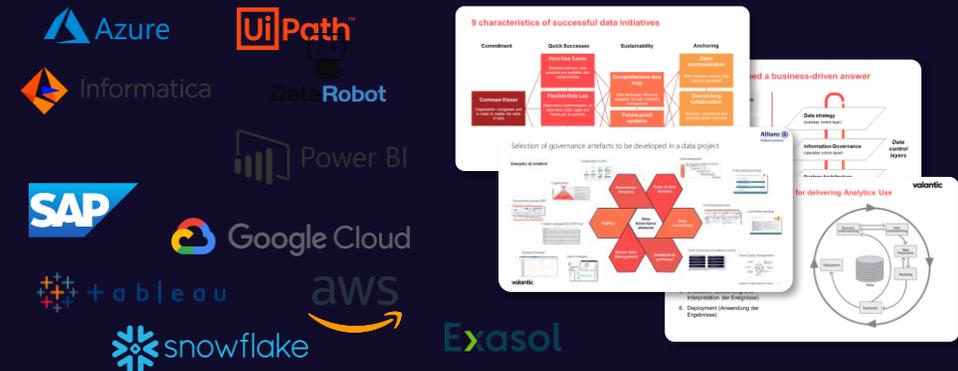

500+
valantic Data & AI experts

Demonstrated Data & AI Thought Leadership

- Founded AIoT user group, AI Circle BW
- AI Track at valantic Digital Excellence Forum '24
- Keynotes & hackathons at leading industry events

Proven methods and technologies

Our valantic service offerings help you in every step of your (Gen)AI journey

Empower your teams with AI capability building

Value proposition

- Make diverse teams of knowledge workers perform better using GenAI
- Train/build prompt engineering skills
- Discover daily business applications for (Gen)AI to increase efficiency
- Engage in group discussions to reflect on profitable experiences

Deliverables

- Hands-on workshop experience for up to 100 participants
- A handy prompting cheat sheet for text and image creation

valantic

Our service offering

- Initial AI skill assessment through a simple questionnaire
- Customized training designed for your team's needs

Apply advanced prompt engineering techniques to 10 different use cases

Generate the content of a book with our prompt engineering techniques

Generate a list of 10 prompts for a specific use case

TARGET GROUP

All employees or a defined subset

DURATION

Min. 2h workshop

Enable (Gen)AI

Craft your (Gen)AI vision in our Masterclass

Value proposition

- Understand the significance of (Gen)AI for your organization
- Craft a visionary (Gen)AI strategy with impactful use cases
- Expand horizons with external expert perspectives
- Tailormade practical exercises and discussions

Deliverables

- Your individual high-level (Gen)AI strategy (vision statement and business goals)
- Longlist of potential use cases
- Common strategic top-down starting point

valantic

Our service offering

- Preparation of workshop incl. 2-3 pre-interviews
- Implementation of hands-on onsite workshop
- Documentation and processing of results

TARGET GROUP

Cross-functional leadership teams

DURATION

4h workshop (+preparation & documentation)

Envision (Gen)AI

Identify your (Gen)AI hero use cases

Value proposition

- Explore (Gen)AI use cases to optimize core processes and daily tasks and discover new possibilities for your company
- Prioritize GenAI projects to focus on the ones that will bring the most benefits and can be successfully implemented in your workplace

Deliverables

- High-level maturity assessment
- A longlist of (Gen)AI use case ideas
- A prioritized shortlist of well-described (Gen)AI hero use case incl. concepts

valantic

Our service offering

- Preparation with interviews and surveys
- 2-day workshop to evaluate and prioritize the use cases
- Synthesis with high-level recommendations

TARGET GROUP

Business functions or cross-functional teams

DURATION

2-4 weeks preparation + 2 days use case ideation workshop + synthesis/documentation

Explore (Gen)AI

Prototype & validate your (Gen)AI use case

Value proposition

- Get advice on whether to do a (Gen)AI project
- Assess (Gen)AI ideas for their profitability, user appeal, and feasibility to ensure they're worth your investment
- Use customized evaluation techniques like cost-benefit analysis, user testing and proof-of-concept prototyping

Deliverables

- Business viability, technological feasibility and user desirability assessment (incl. business case, clickdummy, prototype)
- Decision document for Go / No-Go decision

valantic

Our service offering

- 2 weeks validation sprint, incl. preparation
- Development of a proof of value prototype, incl. UX / UI concept / clickdummy
- Business Case development

TARGET GROUP

Business functions or cross-functional teams

DURATION

1 week use case understanding + 2 weeks prototyping & validation sprint
Additional sprints as needed

Evaluate (Gen)AI

Develop fully functional (Gen)AI solutions

Value proposition

- Turn AI ideas into working solutions that enhance your business flow
- Get full AI development and integration from our agile GenAI team
- Customize AI to tackle your business challenges and deliver fast results

Deliverables

- A cross-functional team of AI specialists, including UX / UI, data scientists, developers, and project managers
- Production-ready AI solutions that are scalable, reliable, and aligned with your strategic goals

valantic

Our service offering

- Crafting project timelines and success milestones
- Integrating AI seamlessly with existing systems
- Building tailored AI solutions with a cross-functional team

TARGET GROUP

Implementation units

DURATION

Multiple of 2-week sprints - following agile development cycles

Deliver (Gen)AI

Develop customizable GenAI chatbots like vally

Value proposition

- Enhance company productivity with an AI assistant that organizes daily tasks, distills insights from documents, and automates form-filling for streamlined operations.
- Access information effortlessly with AI that integrates with your data systems, improving decision-making across all business areas.

Deliverables

- Customized version of valantic GenAI product 'vally' (ChatGPT frontend)
- Available as SaaS / Managed Service / 'Built for you'-option

valantic

Our service offering

- Scalable Azure-based GPT-4 access with LLM interchangeability
- GDPR-compliant data security with Europe-only storage
- Tailored user experiences for enhanced adoption and customizable front-end
- Rapid deployment with adaptable pricing options

TARGET GROUP

Implementation units

DURATION

Multiple of 2-week sprints - following agile development cycles

Deliver (Gen)AI

Empower your teams with AI capability building

Value proposition

- Make diverse teams of knowledge workers perform better using GenAI
- Train/build prompt engineering skills
- Discover daily business applications for (Gen)AI to increase efficiency
- Engage in group discussions to reflect on profitable experiences

Deliverables

- ✓ Hands-on workshop experience for up to 100 participants
- ✓ A handy prompting cheat sheet for text and image creation

Our service offering

- Initial AI skill assessment through a simple questionnaire
- Customized training designed for your team's needs

Enable (Gen)AI

Apply advanced prompt engineering techniques to further increase output quality

Iterative prompting
Build on initial responses with follow-up prompts for refinement

Model-guided prompting
Instruct the chatbot to ask you for the information it needs

valantic

Harness the power of GenAI with our prompt engineering formula focused on LLMs

The Perfect Prompt

1. TASK	Conduct a comprehensive and detailed analysis of innovations in the field of renewable energy technologies, focusing primarily on solar energy.	Mandatory
2. CONTEXT	Given that we are starting a project for a client from the solar sector, I want to inform myself about the corresponding innovations.	
3. PERSONAL	Assume the role of an expert in renewable energy, with extensive knowledge of solar, understanding the practical application and environmental benefits of the innovations.	Important
4. FORMAT	Please provide a hierarchical bullet point list with the technology name as section title, three bullet points for explaining each innovation.	
5. TONE	Please explain it in a professional tone, be short and precise and use easy to understand language.	Nice-to-have
6. EXAMPLES	The bullet point could be structured as follows: - Monocrystalline Silicon Cells: - High conversion of sunlight to electricity - Less 25-30 years, good long-term investment, - High upfront costs.
